Profile

There are many reasons to choose BCI packaging. You may opt for BCI because of our specific expertise as the leading provider of superior, large-sized packaging systems. Or you may select BCI for our seamless product spectrum that provides the right product to meet every need. Or perhaps because of our competitive pricing for the highest quality product, our ability to supply products to throughout Southern, Eastern and Western India and on time. But probably it is all of these reasons combined that makes it is so easy for our valued customers from the chemical, petrochemical, food, and pharmaceutical industries to choose BCI.

To ensure things stay this way for the time to come, the Client has been the continual focus of BCI. All activities revolve around this focus. BCI offers total packaging solution to its partners and clients. The company is involved in key area such as:

- Packaging development
- Product customization
- Regulatory Issues
- Environmental Issues
- Export Consultation

Double Layer L Ring Barrells

BCI offers international design Double Layer L ring barrels suitable for bulk packaging of all types of liquid chemicals, acids and other liquid food products. These designs are universally accepted and used by the Industries like Lubricating Oils., Acids, Chemicals, Paints, Edible Oils, Inks and Resins, Pharmaceuticals and Food Industry.

Salient Features

- . Blow Molded single piece, with no welds and joints leading to One Piece Leak Proof Barrel
- . Greater impact strength at low temperatures
- . Designed for high density and aggressive fill goods and suitable for filling temperatures up to 100 degree Celsius
- . Significantly increased stacking stability
- . Higher stress crack resistance and increase chemical resistance
- . The upper ring improves bung protection during transport and handling
- . Highly durable, easy to handle and with increased decant ability
- . Double layer with natural white inner suitable for food grade application
- . Conforms to IMDS Code 6312 and approved by the Indian Institute of Packaging
- . Easy removal of residual contents and available with integrated extraction systems
- . Excellent clean area with multi color printing for better branding
- . Universally accepted design with high levels of re-usability

Narrow Mouth Containers

Capacity: 5 Ltr - 210 Ltr

Recommended for all liquid packaging

BCI offers narrow - mouth drums in 3 different shapes namely the jerry cans, the square and the round drums catering to varying customer requirements. While all BCI jerry cans offer ideal features for liquids, the Square & the Round are designed for high filling weights and high stacking requirements.

Salient Features:

- UN Approved Blow Molded drums
- International design - wide acceptance and universal suitability
Zero leakage due to sophisticated screw cap with integrated sealing inserts
- 100% decant ability
- Pilfer proof sealing arrangement
- Highly optimal for manual handling with space utilization as side handles could be tucked - in
- High stack ability with or without pallets
- Designed for optimum space utilization of shipping containers
- Large flat printing area for aesthetic marking and branding
- Availability of breather caps with vent inners for gas vent
- application to suit packaging of highly concentrated Hydrogen Peroxide and other similar chemicals
- Weight optimization to enhance cost effectiveness depending on customer requirements

Full Open Top Drums

Capacity: 30 Ltr - 220Ltr

Recommended for all Powder, Viscous, Solid or Semi-Solid Material packaging BCI's Open - Top plastic drums are made from a HMHDPE resin and manufactured to the highest standards of quality and consistency. This material makes the drum extremely strong, allowing for easier handling and savings on shipping costs. They consist of blow molded seamless drum, heavy-duty matching lid, snap fit clamping ring and pilfer evident lock. In addition, the drums save valuable warehouse space because they are stackable and can be stored outside without rusting. This type of drum comes in different sizes to fit different needs.

Salient Features:

- UN Approved Blow Molded drums & Injection Molded lids
- Easy filling and draining due to large opening
- Easy cleaning, thus suitable for multiple trip usage
- Molded handles to facilitate easy handling manually or through standard material handling equipment
- Simple closing / opening mechanism with snap fit clamping ring or threaded type caps
- Excellent drop impact and stack ability
- Leak proof and liquid tight
- Odorless and non toxic, suited for packing of food products
- Right sizes for optimum export container utilization
- Conforms to IS: 6312 and UNO / IMDG Code
- Customized colors of drums and caps

PPCP Coni-Pack Pails

Capacity: ½ Kg - 5 Kg

BCI offers international design coni pails which are strong, sturdy and made from food grade Poly Propylene resin. These containers have been instrumental in replacing metal tin containers because of advantages like attractive pack, no rusting / corrosion, high shelf life, leak proof and also fetching high resale value. Coni pails are a widely accepted packaging for Lubricating Oils, Greases, Paints, Chemicals, Edible Oils, Inks and Resins, Pharmaceutical and Food products to name a few.

Salient Features

- Tight fitting lid, leak proof sealing
- Tamper proof locking
- Excellent stacking strength
- Excellent bright white color adds to the attraction
- Excellent area for printing of up to 8 colors enhances branding and identification
- Highly nest able

International Customized Designs

Capacity: 250 ml - 300 Ltr

Take your pick: There is a BCI design catering to all your needs.

At BCI, we believe in catering to individual customer requirements on case-by case basis. In case our vast product portfolio is unable to meet their packaging requirement, we have a dedicated team to help assist them in Packaging Deveopment by taking into account usability, marketability, product differentiation, costing and standardization. BCI also offers value added services like assisting in seeking packaging approvals from both Local & International bodies, and help in retrieval and disposal of used packaging.

Quality Standards

BCI Standards:

For over so many years, all our customers have relied on the industry expertise and experience of BCI. All of our products and compatible worldwide; they are exchangeable and optimally tailored to the special needs of every company active on world markets. No matter how different the requirements in the various countries are - products from BCI can be used anywhere without any trouble at all.

The fundamental principle is as logical as it is sophisticated in its implementation: Uniformity in Standardization

BCI Quality:

BCI packaging systems are subjected to enormous stress, day in, day out. That is why everyday in our laboratories we test the high degree of product quality that leaves our company. In addition to drop and vibration tests, we also test for long-term properties of our Containers such as their behavior under a maximum of stress to further improve our products.

- Complete control of the entire process chain, since all key components are manufactured in-house.
- Constant laboratory and practical tests.
- Extensive quality tracking.
- Standardized specifications for all sites.

Quality Standards
